INTERNATIONAL GREEN TECHNOLOGY & PURCHASING CONFERENCE

ABOUT THE CONFERENCE

Asia, as the world's largest manufacturing hub, is emerging as the nexus in promoting green technologies and eco products.

Global green economic initiative is being launched in many countries whereby policies, investments, and spending are restructured and reallocated towards the reconfiguration of businesses and infrastructures to deliver incremental returns on capital investments while simultaneously reducing greenhouse gas emission, waste pollution, natural resource consumption, and social inequalities.

Endorsed by the Prime Minister of Malaysia

Worldwide Participation

Conference Sponsors

The International Green Technology and Purchasing Conference, in recognising this worldwide trend, is host to the region's largest green technology event bringing together renowned local and international experts and 1500 participants to discuss green technology policies and strategies, while promoting green technology and eco products.

OBJECTIVES

- To create awareness concerning the importance of green technology, eco products and services for national green growth;
- To provide a forum for dissemination of R&D findings and applications of green technology;
- To create and provide business-to-business opportunities in green technology and green purchasing;
- To generate market demand for green technology and eco products through the promotion of green purchasing and green values.
- To promote Malaysia as the regional green technology and eco products hub.

HIGHLIGHTS

- Factor Five: Transforming the Global Economy through Energy & Resource Productivity
